

Western Kentucky University

CSUN Course	Course Number	Course Title	Course Description
405 (340)	CD 405	Phonetics	Study of distinctive feature systems that classify consonants and vowels, the definitions of phonological process terminology, and practice in broad and narrow transcript of words and connected speech.
410 (345)	CD 347	Science of Speech and Hearing	Overview of the linguistic, psycholinguistic, and sociolinguistic variable of speech and hearing. Basic orientation to instruments for measuring acoustic parameters.
415 (360)	CD 481	Normal Speech & Language Development	Introduction to development of speech and language across the lifespan with emphasis on comprehensive child development. Topics include development of speech and language, play, cognition, socialization, and emerging literacy.
442	CD 484	Speech Anatomy and Physiology	Designed to help students identify the structures and functions which comprise the speech and hearing mechanism. The relation of this mechanism to the production and development of speech and language will be addressed.
445	CD 482	Audiology	Review of basic speech science, ear anatomy, physiology and pathology. Training in auditory testing by speech, pure tone, and bone conduction. Testing techniques for pediatric populations.
446			
450			
451	CD 483	Articulation Disorders	Study of the etiology, evaluation, and management of phonological process proficiency in children. Includes dialectal and bilingual differences. Stresses proficiency in administering protocols and planning therapy using several approaches.
462	CD 486	Language Disorders	Identification, diagnosis, and treatment approaches used with language delayed children. Covers current state and federal legislation as related to service delivery models. Evaluation strategies include language sampling and report writing. Treatment approaches based on medical and educational models with emphasis on functional language therapy.
469A	CD 485	Assessment in Communication Disorders	Focus on assessment using standardized and non-standardized screening and diagnostic instruments. Development of formal and informal evaluation techniques common to speech pathology/audiology. Overview of data gathering and interpretation regarding communication functions in persons of all ages. Includes multicultural assessment tools and methods.
