

University of Florida, Gainesville: Post-Baccalaureate Program

CSUN Course	Course Number	Course Title	Course Description
405	SPA 3003	Phonetic Theory and Transcription	Experimental investigations of human speech processes. Topics: measurement of speech movements; measurements of pressures and airflows in speech production; source-filter theory of speech production; computer-aided waveform analysis and spectral analysis of speech; perception of speech sounds; phonetic transcription; models for speech motor control and perception; speech development; and speech disorders.
410	SPA 3011	Speech Acoustics	Introduces scientific methodologies, physics of sound, acoustics, and elementary instrumentation related to human speech communication.
415	SPA 4004	Language Development	Examines typical patterns of language development across the life span. Various theoretical perspectives on language acquisition are presented and current information regarding the biological, social, and cognitive bases for language will be reviewed. Major communicative achievements that characterize the various stages of language development will be discussed.
442	SPA 3101	Speech Anatomy and Physiology	Introduces elementary anatomy, physiology and neurophysiology of the speaking mechanism.
445	SPA 4302	Intro to Audiology	Introduces the psychophysics of sound and the practice of audiology, as well as the anatomy and physiology of the auditory system. Also presents the common pathologies of the auditory system, the impact of hearing loss, the types and characteristics of hearing loss, the conventional procedures used to assess hearing, the interpretation of audiological test findings, and the criteria for initiating audiological referrals.
446	SPA 4321	Audiologic Rehabilitation	Overview of aural rehabilitation and methods in auditory training and speech reading with hearing-impaired individuals.
450	SPA 4250	Introduction to Speech Disorders	Studies speech-based disorders of communication: phonology, motor speech, resonance, voice, and stuttering.
451	SPA 4250	Introduction to Speech Disorders	Studies speech-based disorders of communication: phonology, motor speech, resonance, voice, and stuttering.
462	SPA 4400	Introduction to Language Disorders	Studies language-based disorders of communication: specific language impairment in children, traumatic brain injury, aphasia and dementia.
